

CASE STUDY

Glasspaper's Microsoft University uses world-renowned Microsoft trainers to deliver training to 130 students in Norway

Objectives

In August of 2022, Glasspaper's Microsoft University onboarded a large group of students whom they would assist in training and developing, ready for their new jobs at Microsoft partner companies.

Trainers worked with a dedicated group of students to equip them with the necessary skills.

OUR BENEFITS

Benefit One

Having the same trainers throughout the 6-week program offers a remarkable advantage: a consistently supportive and conducive learning environment for students.

Benefit Two

All trainers are Microsoft Certified Trainers, ensuring students are taught by industry professionals with extensive experience.

Benefit Three

The collaboration involving Proximo 3, Glasspaper, and Microsoft establishes a mutually beneficial synergy that amplifies the advantages provided by Microsoft University.

Challenges

Microsoft University welcomed 130 students to its six-week intensive training program which required the most qualified trainers who were endorsed by local Microsoft employees.

With over 800 student applications, Microsoft University is highly competitive and popular due to the great training programme offered

glasspaper

Solutions

For six weeks, Proximo 3's trainers Mark Christie and Andrew Bibby lived in Oslo, Norway helping to deliver 10 Microsoft specialisation training courses.

There was a 90+% pass rate across all 10 courses and Microsoft University was named the most popular IT graduation programme in Norway for the third time.

During my time at Microsoft University, Mark led courses on Power Platform and Business Central. His teaching stood out due to his exceptional ability to incorporate his own work experience. Additionally, his courses emphasised the importance of soft skills in consultancy, showcasing his insightful understanding of the bigger picture.
